● AVAILABLE FOR SELECT WORK

№ 001 / RÉSUMÉ
UPDATED · APRIL 2026

Matthew Troke.

Full-stack Software Engineer

A decade of shipping product at the intersection of engineering and design — from inventory platforms at Stitch Labs, to integration flows for merchants at Square, to founding two self-hosted, production products on modern edge infrastructure.

§ 01 Professional Experience

TWO ENTRIES

Square ↗

JUL 2020 — JUL 2023

Software Engineer · 3 years

SAN FRANCISCO, CA

- **Built integration wizard flows** inside the Square Dashboard, enabling merchants to advertise their catalog across Google, TikTok, and Meta.
- **Partnered closely** with product and design on high-stakes merchant surfaces; authored foundational frontend infrastructure (local dev, testing, mocking).
- **Interview-certified:** helped hire frontend engineers across levels.

REACT TYPESCRIPT EMBERJS GOLANG DOCKER

Stitch Labs ↗

OCT 2018 — JUL 2020

Software Engineer · 2 years · Acquired by Square

SAN FRANCISCO, CA

- **Shipped frontend features** in AngularJS for a complex, enterprise-grade inventory management platform.
- **Independently built** a React/Redux OAuth dashboard giving 3rd-party logistics providers scoped access to internal APIs.

REACT ANGULAR PHP LARAVEL SQL DOCKER

§ 02 Solo Projects

TWO ENTRIES

Statik Form ↗

2026 — PRESENT

Founder & Engineer

STATIKFORM.COM

- **Form backend for static sites**, running entirely on the Cloudflare edge stack — built and deployed end-to-end, solo.
- **Edge-native architecture:** Cloudflare Workers for request handling, Workflows for durable execution, D1 for relational data, KV for low-latency config.
- **AI spam filtering** keeps submissions clean without CAPTCHAs or friction for legitimate users.

SVELTEKIT CLOUDFLARE WORKERS WORKFLOWS D1 KV AI / LLM

Neural Decks ↗

JUL 2025 — PRESENT

Founder & Engineer

NEURALDECKS.APP

- **Real-time multiplayer card game** where users create, share, and play custom decks over WebSockets.
- **AI-generated content:** LLM pipeline turns prompts into playable decks on demand; Stripe handles premium currency end-to-end.
- **Self-hosted** on Oracle Cloud and AWS — owning everything from DB to DNS.
